Essential disinfecting services during COVID-19

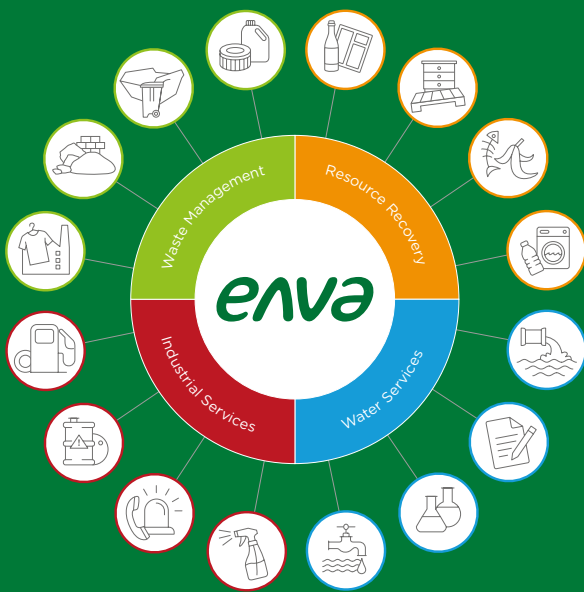

Working in partnership with Local Authorities where our communities need us most

With the current spread of Coronavirus (COVID-19) businesses are required to take precautions to slow the spread of the virus through essential hygiene management.

Enva are a local company seeking to support our key Local Authorities through unprecedented changes. We aim to offer help and support and be part of your contingency measures to ensure there are no disruptions to the services you provide.

We are ready to support our local authorities on the Island of Ireland, where you need us most.

On-site disinfection services

- Disinfection services utilise mobile mist spraying equipment by trained operatives
- Across a range of settings including- offices, factories, shops & retail outlets, call centres, schools, public buildings, vehicles & vehicle cabs and hard to reach areas.

Fully managed street disinfection services

- This service mobilises tankers with misting sprays. These are operated by fully trained Enva employees all with the necessary PPE and working to a pre agreed route.
- Disinfection of public areas such as high streets, retail areas, parks and other communal areas gives people the confidence they need to start using them again and help society to take the first steps towards a degree of normality.

We understand the health and safety of employees and the communities in which we operate continues to be the primary concern.

Break the infection chain

- Disinfecting streets and other public areas kills the Covid-19 virus when present on surfaces. This reduces the opportunity for infection and breaks the infection chain.
- ECOSAN provides a safe and effective replacement for conventional cleaners, bleaches and disinfectants. Being water based, ECOSAN is safe and easy to use, with no unwanted side effects such as taint, smell or handling hazards.
- ECOSAN, contains Vantocil- a fast-acting bactericide and virucide and is a 20% aqueous solution of poly (hexamethylene biguanide) hydrochloride, also known as PHMB. The product can also be supplied direct to customers in 25 litre drums and IBC's.
